Piotr Piękos

Objective

Creating robust machines that can abstract their learned knowledge and use it effortlessly in entirely new environments that share a similar structure.

Education

University of Warsaw Master's Degree

Mathematics, Master Graduation: October 2021

Faculty of Mathematics, Informatics and Mechanics,

Thesis was an investigation of mathematical abilities in language models. It was accepted to ACL-IJCNLP 2021 in the form of a publication. More on that below.

University of Warsaw
Mathematics, Bachelor
Graduation: April 2018

Faculty of Mathematics, Informatics and Mechanics,

Thesis about using residual connections in recurrent neural networks

University of Warsaw

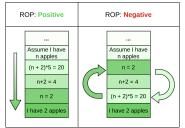

Computer Science, Bachelor

Faculty of Mathematics, Informatics and Mechanics,

Thesis about porting OpenFace for face recognition on the phone

Publications

Measuring and Improving BERT's Mathematical Abilities by Predicting the Order of Reasoning (ACL, oral)

This project investigates mathematical abilities in language models and proposes training on rationales as a bridge between informal natural language and formal mathematics. Additionally proposes novel losses for better utilization of the rationales. Our model is the state of the amongst model with low inductive biases and the results are comparable with hand-crafted models.

Conferences and workshops:

- o ACL-ICJNLP 2021 (Main Conference, Selected for an oral presentation)
- o EEML 2021 (Best poster award)
- o MathAI (ICLR 2020 Workshop)
- o BayLearn 2020

Research engineer 11.10.2021–now

Improving the quality of search neural reranking model

ITMagination

Data Science/ ML Team Leader

01.07.2019-01.06.2020

Bachelor's Degree

Graduation: July 2017

I was responsible for suggesting approaches to handle business problems with machine learning. I also together with the team implemented these solutions in PyTorch / TensorFlow. Example Project: Categorizing patent ideas by natural language description. One of methods involved using sentence embeddings produced by fine-tuned BERT.

ITMagination

Data Science / ML Consultant

01.07.2017-01.07.2019

Implementing machine learning solutions for external companies.

Hcore

Python Developer Internship Writing backend software in Python.

01.07.2016-30.09.2016

Open-source projects

BERT for trax | **trax**: Open source contribution for trax (google library for neural networks using jax) It adds BERT model and masked language modeling pipeline preparation. Github ♂

Dueling Double DQN reproduction | **TensorFlow** + **OpenAl gym**: Reproduction of a DQN paper with extensions (double, duelling architectures) using basic neural network libraries (tensorflow and pytorch) Github ♂

Languages

English: Advanced Polish: Native

Interests

Chess, Computer Games, Psychology

I hereby agree for processing my personal data, included in my job offer, for the purpose of recruitment (as defined in the Act of August 29, 1997 on the Protection of Personal Data (Journal of Laws No. 133, item 883).
